2. Mat the designer paper onto the Whisper White cardstock and adhere to the card base.

3. Carefully position the deer thinlit in the middle of the copper foil. Angle it so it appears as if it is leaping. Die cut out. Use the negative piece for the card, and save the deer to create the tag.
4. Emboss the Whisper White cardstock with the embossing folder. Adhere to the back of the foil panel with dimensionals, then adhere this piece to the card base with dimensionals.
5. Heat emboss the sentiment with copper embossing folder. Snip the ends to form a banner. Adhere to the card with dimensionals.

Instructions for Bag and Tag:

1. Follow the directions on the Gift Tag Punch Board to create a large gift bag.
2. Attach the Sahara Sand handle using small copper brads. Make certain the heads of the brads are on the inside of the bag. Cover the prongs by adhering Copper Foil strips on the front and back of the bag.
3. Die cut a 2-5/8" Whisper White circle. Emboss with the Softly Falling embossing folder. Adhere to the corresponding scallop circle cut from copper foil. Poke a hole at the top, and add a snippet of Very Vanilla/Copper ribbon.
4. Carefully position the deer thinlit in the middle of the copper foil. Angle it so it appears as if it is leaping. Save this "negative" piece to create the coordinating card. Punch out the deer and adhere to the tag with dimensionals. Tie the tag to the bag.
